

News and Innovations July 2025

When precision counts:

You set the goal. We find the way!

Every component is unique – just like our solutions.

With over 30 years of experience in abrasive flow machining, we use your samples to develop precisely tailored machining processes for the highest surface quality. The process is convincing wherever reproducible and high-quality results are required – especially for internal surfaces and complex component geometries.

This is where our strength lies. As an experienced partner, we support you with technical expertise and economic thinking. Together we will develop your perfect solution – efficient, targeted, sustainable.

The path to your individual machining solution:

ANALYSIS

of your component

DEVELOPMENT

of an optimized machining process

IMPLEMENTATION

Contract machining or integration into your production

Your benefits at a glance:

- + In-house fixture construction – economical, flexible and functional
- + In-house streamer production – individual and variable
- + Cost-effective contract machining – reliable and high quality, short delivery times
- + In-house mechanical engineering – customized to your requirements
- + Sophisticated machine program – for abrasive flow machining, polishing, rounding and vibratory finishing
- + Industrial cleaning technology
- + Individual automation concepts – in cooperation with Pütz Group companies

Perfectly deburred, precisely rounded, shiny polished surfaces.

Our **heat exchangers** combine a ring and rib design – for maximum cooling and heating performance. The specially developed „waterproof coating“ also protects against condensation – for long-lasting and reliable streamer use.

Customised devices – precisely tailored to your workpiece
Each device is individually designed, constructed and manufactured by us – to suit the machining task. It fixes the workpiece, guides the streamer precisely, protects sensitive areas and functionally closes off the machining system.

Pütz Group – a strong association of specialists.

Our network of experts optimises your production for maximum efficiency.
